

Ali-Flex® RTU

Disinfectant cleaner
ready to use

Ali-Flex® RTU is a disinfectant cleaner ready to use based on stabilized sodium hypochlorite (0.6% / 6000 ppm when packed) and powerful cleaning agents. Ali-Flex® RTU is time saving and user friendly because the product doesn't require additional dilution or manipulation of concentrated chemicals. Besides being a general virucidal, fungicidal and bactericidal solution, Ali-Flex® RTU kills *C. difficile* spores in 5 minutes. These reasons make Ali-Flex® RTU the perfect solution to use when there is an abnormally high increase of infections (outbreaks).

The cleaning agents in Ali-Flex® RTU enable the liquid to wet entirely non-porous surfaces, while degreasing and penetrating through dirt (such as urine, blood and feces). Its formula prevents corrosion and emits low odor. Ali-Flex® RTU can also be used in food establishments.

Advantages

- Kills *C. difficile* spores in 5 minutes
- Contains 6 000 ppm of stabilized sodium hypochlorite
- Formula preventing corrosion
- Low odor
- Virucidal / Bactericidal / Fungicidal
- Contains powerful cleaning agents
- No need for additional dilution
- Excellent disinfectant cleaner

Physical and chemical properties

| | |
|---------------------------------------|-------------------------------------|
| Appearance | Colorless liquid |
| Odor | Unscented |
| Viscosity (25 °C) | < 10 cPs |
| pH (25 °C) | 11.0 - 13.0 |
| Specific gravity (25 °C) | 1.000 - 1.020 |
| Flammability | Non-flammable |
| Stability | Stable 1 year between 15°C and 30°C |
| Storage | Avoid frost and excessive heat |
| Active ingredient | Sodium hypochlorite |
| Percentage of active ingredient | 0.6% |
