

Healthcare Cleaning

The Professional Way

Much more than just products

Marino Vileda Professional offer you much more than the products required to clean your healthcare environment to the highest standards. When you choose a Marino Vileda Professional system you automatically gain over 40 years experience of healthcare cleaning across North America and Europe.

One of our Healthcare Specialists will undertake a full assessment of your cleaning requirements, suggest the right products for you and offer a customized training and support package for effective implementation. Implementation isn't the end of the offer though, our ongoing after-sales support and training gives you piece of mind.

Durable Microfibre cloths

- Machine washable over 500 times
- 99.84% removal of bacteria

- 1000 wash guarantee with hypochlorite

Customized on site training and support package

Swept Duo

- Double sided mops = twice the cleaning
- Fewer mops = lower costs
- Complete system = solves all tasks

How to cut costs and defeat bacteria. The Swep System.

Some say it's almost a 'mission impossible' to maintain maximum levels of hygiene and reduce the risk of hospital associated infections while keeping daily cleaning simple, effective and cost efficient.

We don't agree. We say it's definitely possible to improve hygiene levels and cleaning standards while keeping within budgets.

With the Marino Vileda Professional Swep one-step pre-prepared method and comprehensive on-site support packages, we can help you reach your goals – ultimate cleaning performance, the prevention of cross contamination and reduction of hospital associated infections.

Complete System

The Marino Vileda Professional Swep system is a complete one-step pre-prepared cleaning system tailor-made for hospital cleaning. Swep is the most complete and advanced microfibre cleaning system on the market and can be used not only for cleaning floors and stairs, but also for walls, ceilings and hard to reach places.

For maximum results, the Swep system includes a range of other high performance cleaning products including the configurable Origo trolley range and 100% microfibre performance in a re-usable and disposable cloth.

Maximum Results

The combination of these innovative products, our expertise in the manufacture of microfibre systems, customized training programs and continuous support

means you can be ensured of maximum cleaning and hygiene results.

Why Pre-preparation?

The pre-prepared method is exactly what it says – every mop and cloth required for a days' cleaning is centrally prepared in advance with the correct amount of water and chemical.

Pre-preparation and the mechanical action of the microfibre mops dramatically reduces the amount of chemicals required and leaves each mop damp enough to remove dirt without leaving the floor wet. Also, as the mops are pre-dosed they replace heavy buckets and the need for wringing mop heads.

After cleaning one room/area the mop is simply changed and another pre-prepared mop is placed on the frame for use in the next room/area. The soiled mop is then placed into a bag for laundering, preventing cross contamination.

Award Winning

Marino Vileda Professional have won several international awards for outstanding functionality and design. Swep Duo won the 'iF' product design award and 'red dot' product design award in 2006 and the Origo trolley system won the 'red dot' product design award in 2008.

Innovation not imitation

Swep is no newcomer. Marino Vileda Professional has been developing and manufacturing cleaning systems for the healthcare market across Europe for over 40 years. Over this period our healthcare experts, in-house production and R&D departments have ensured the Swep system is always ahead of the market:

- Fifth generation of microfibre mops
- 1000 wash guarantee
- Independent testing of mops and cloths proving up to 99.99% removal of bacteria (*Pseudomonas aeruginosa* and *Staphylococcus aureus*)
- Durable and disposable microfibre wiping solutions
- Choice of single or double sided mopping
- Fully customized trolley system developed for use with Swep
- Dual-action solution for effective cleaning of safety floors
- Full on-site support and implementation program
- Tailor made training packages, experience of training over 3000 operatives on a site
- Colour coding on all parts of the system

Interchangeable single or double sided mopping!

You now have the choice between the Swep Classic single sided system or the new Swep Duo double sided system. Swep Duo features double-sided high performance mops which allow you to clean twice as far with one mop, perfect for larger patient rooms or corridors. Both the Classic and Duo systems are fully inter-changeable with all Swep equipment and Origo trolleys, allowing you to create a tailor made cleaning solution.

Sweep Classic Mops

The classic single sided mop solution.

Microfibre

- Active fibre fringe traps all large dirt particles and hair
- Microfibre trailing edge gives outstanding cleaning performance and pick-up of the remaining dirt off the floor
- 1000 wash guarantee even when used with hypochlorite

Sweep Duo Mops

A new generation of double-sided mopping.

- All the benefits of the classic MicroCombi and MicroTech but with the added advantage of double sided mopping

Sweep tools and accessories

The Sweep system offers you the complete cleaning system with a range of microfibre products specifically developed to fulfill all your cleaning requirements including floors, walls, staircases and high/awkward to reach areas. These tools include the Duo-Duster, Duo Handmop, dosing sieves, prep-boxes, dustpans and dustpan sweepers.

Origo Trolleys

The Origo range of trolley systems for use with the Sweep Classic and Sweep Duo systems is much more than a method of transporting the mops.

Each trolley has storage for up to 40 pre-prepared mops (allowing cleaning of up to 1,600m² / 17,225 Sq. Ft.), pre-prepared and disposable microfibre wiping, waste collection and a full range of Sweep tools and accessories including locking cabinet

Microfillament Microfibre cloths

Traditional microfibre and ultra-microfibre cloths have a fiber thickness of less than 0.03dtex. Marino Vileda Professional microfibre cloths utilise microfilaments with a fibre thickness of 0.015dtex.

QuickStar micro

Ideal for use with the pre-prepared wiping method and offers fast high performance microfibre cleaning.

- Washable over 500 times
- 99.84% removal of bacteria

MicroRoll

The ultimate hygienic solution and the first disposable microfibre on the market that offers 100% microfibre performance at a throw-away price.

- No concerns over spores surviving laundering
- 99.99% removal of bacteria
