

Origo

One million configurations

Origo

One million configurations

Tomorrow will be different. Be prepared.

New contracts, new demands, new methods, new staff. If there is one thing certain about cleaning in the future it's that there will be changes. Lots of changes. With this in mind, we created the new Origo Line trolleys. You can either choose one of our standard configurations or have your trolley customised exactly to your requirements.

One Great Idea

The main idea behind the Origo Line is to create a trolley that covers every possible cleaning requirement. For now and forever. The solution was not to invent a new trolley.

Instead, the outcome is a complete range of trolleys with full flexibility and future-proof adaptability: the Origo 300

Three Different Configurations

The Origo FX, HX, HHX are all built around the same idea of long-life performance. The trolley you start with depends entirely on your requirements. The Origo FX is the entry model with a basic fixed configuration. The Origo 300 HX is the configurable alternative to the FX, again using a metal frame construction with an added compartment. The Origo 300 HHX has two levels of compartments and the F extension.

The three different configurations offer the ability to retro-fit and recustomise your trolley over and over again, offering almost limitless possibilities and outstanding endurance in demanding environments

Millions of Possibilities

When you've decided which Origo series suits you and your requirements best, the fun really begins! There are more than 1.2 million ways of configuring your Origo trolley to meet your specific requirements.

On www.origo.vileda.com you will find the OrigoCreator – a configuring tool that is both easy and fun to use. Mix and match, drag and drop, extend and equip – the Origo Creator is where your ideas and visions become reality. And when you've decided on your individual configuration and had the trolley of your dreams delivered to your door, it's just as easy to retro-fit it when your requirements change.
