

TRAVABON®

Before work cream that supports the natural function of the skin when working with oil-based workplace substances and organic solvents. Also facilitates cleaning of the skin when exposed to stubborn dirt.

Description

TRAVABON® contains skin compatible special emulsifiers that greatly reduce the adherence of non-water-soluble substances (e.g. oil, grease, glues, resins, paints, graphite and metal dust) to the skin. These emulsifiers make skin cleaning quick and easy. In fact if TRAVABON® is regularly applied before work, the use of strong skin cleaners can be significantly reduced.

TRAVABON® contains a high percentage of inorganic pigments which help to keep skin healthy, particularly when in contact with organic solvents (e.g., fuels, degreasers, paint thinners, polishes) or when working with non-water-soluble oils.

Areas of Application

Machine shops
Mechanics and equipment maintenance
Metalworking
Printing

Product Description

White greyish, slightly scented, silicone-free and oil-free suspension ointment. Density (at 68° F): 1.23 g/cm³; pH value: 6.5-7.5.

Instructions for Use

- Thoroughly wash and dry skin before starting work as well as after breaks.
- Apply TRAVABON® to hands and exposed skin making sure to cover all areas, including between fingers and around finger nails.
- To clean up, use plain water and wash TRAVABON® and dirt from the hands. Then, if needed, used a mild or medium-duty hand cleaner to finish washing.
- TRAVABON® must be reapplied after strong perspiration or contact with water
- DO NOT use TRAVABON® on the face.

Packaging Sizes

100ml tube
1000ml SOFTBOTTLE®
(to be used with the STOKO VARIO ULTRA® or STOKO VARIO® SVP dispensers)

Features

Water-soluble cream with high percentage of inorganic pigments

Contains special skin compatible emulsifiers

Fat-free, Silicone-free

Available in 1000ml softbottles or tubes

Benefits

Great for working with water-repellent substances such as oil, grease, resins, paints, graphite and metal dust.

Facilitates easy cleaning of the skin

Does not cause interference with paint and maintains good grip during work

Can be available to employees in specific work areas with a dispenser or assigned to specific employees in individual tubes

...keeping working skin healthy.

STOKO®
/ Skin Care / 

Qualitative Composition

INCI DECLARATION*:

Water
Talc
Sodium Cocoyl Isethionate
Glycerin
Silica
Glyceryl Stearate
Laureth-10
Bentonite
Xanthan Gum
Algin
Sodium Phosphate
Fragrance
Lactic Acid
Potassium Sorbate
Diethyl Sodium Sulfosuccinate
Silver Chloride
Propylene Glycol
Titanium Dioxide

The ingredient declarations used are in compliance with the International Nomenclature for Cosmetic Ingredients (INCI).

Shelf Life

TRAVABON® can be stored in a closed container at room temperature for at least 30 months at room temperature.

STOKO® Skin Care products are tested for stability at temperatures between 23°F and 104°F. When tested at temperatures below 41°F and above 86°F, the products begin to fluctuate in viscosity.

First Aid

Should product accidentally enter the eyes, rinse out with plenty of water. Do not rub eyes. Contact a physician if burning sensation persists.

Effectiveness Test

In an independent test, TRAVABON® demonstrated an effect of supporting the natural function of the skin against the solvents n-hexane and toluol (Mahmoud and Lachapelle). No other emulsion or suspension creams tested proved effective when working with these substances.

Skin Compatibility Tests

TRAVABON® demonstrated a good skin compatibility in thorough testing using the Scarified Duhring Chamber Test. Skin Compatibility certificate from the Dermatological Clinic of the Municipal Hospital, Krefeld Germany available upon request.

Additional Information

Frequent contact with materials that stress the skin also require the use of special skin creams before and during work, as well as the application of skin care products after work. Customer service at STOKO® Skin Care will gladly assist you in choosing the right combination of products.

Occupational skin irritation, frequent washing or harsh climates can lead to dry, rough and chapped skin. This condition can result in irritation/rupture of the outer layer of the skin which impairs its natural protective function. As a prophylactic measure against such damage or to regenerate damaged tissue after work, the skin should be regularly treated with a conditioning product such as STOKOLAN®, STOKO® LOTION or STOKO VITAN®.
