

AccuDose®

The Efficient, Low-Flow Dispenser

AccuDose® dispensers are an economical way to dispense a variety of automatically diluted solutions. With just the touch of a button, concentrated chemicals can be automatically diluted and dispensed into spray bottles, buckets or other containers.

The dilution is controlled by drawing chemicals through various metering tips and injecting the metered amount into the water flow. AccuDose can dilute with consistent accuracy at water pressures below 40 PSI.

- Customize with any combination of product configurations
- Fittings allow for more than three products to be dispensed
- Expandable installation
- Time and labor savings; solutions are prepared accurately with reduced preparation time
- Available with E-Gap, AirGap, or standard eductors
