

Best performing, longest wearing broom for the toughest workplaces.

agf professional™ push brooms

AGF Professional push brooms are Canada's toughest braced brooms because they are made with quality components. The strong bolt-on handle is reversible to encourage even wear of the fibres and when properly maintained, doubles the life of the broom. The steel brace helps to eliminate broken hardware and worn threads. Quality synthetic fibres are oil and solvent resistant and have excellent memory (the ability to return to their original shape). Put this durable braced broom to the test in your workplace.

features and benefits

- Fibres are colour-coded to quickly identify the sweeping action/stiffness of the bristles.
- Bolt-on handle is reversible for even wear of fibres resulting in a longer broom life.
- 60 inch x 1 1/8 inch hardwood handle is the strongest available.
