

# BIOMOP™ DUSTING SHEETS

## FEATURES AND BENEFITS

- Disposable and biodegradable, ideal for companies implementing green cleaning programs.
- No chemicals or water required.
- Economical to use every day, no laundering needed.
- Picks up and holds dust, hair, dander & bacteria.
- Twice as efficient as the leading brand sweeper sheet.

The Biomop™ will degrade to a fraction of its original size within 6 weeks!

This product is certified as biodegradable by an independent third party laboratory under ASTM and DIN standards.

# REASONS TO CHOOSE BIOMOP™ DUSTING SHEETS

## BIOMOP™ - AGF'S DISPOSABLE DUSTING SHEETS

The Biomop™ is an electrostatically charged mop sheet that draws in - and locks in - dirt and dust. Regular dusting improves indoor air quality and when used correctly, independent testing shows that the Biomop™ sheet is twice as efficient as the leading brand sweeper sheet.

## ECO FRIENDLY

The Biomop™ is an environmentally responsible 'dry' cleaning tool. This product can be safely disposed of in a landfill or added to compost. Each sheet will biodegrade to a tiny fraction of its original size within 6 weeks. What's more, it is highly effective in removing dust in dry applications, reducing the need for water and chemicals. It is ideal for companies implementing green cleaning programs.

## ENVIRONMENTAL ALTERNATIVE

Eliminates the need for costly laundering or when laundry facilities are not available. It can reduce cross-contamination in health care institutions; a "one-sheet-per-room" policy is easily implemented. Ideal for environments such as schools, gymnasiums, offices and retail facilities.

## SURFACES

The disposable non-woven dusting sheets use an electrostatic charge to attract fine dust and particles from smooth floor surfaces. The Biomop™ can be used on every kind of hard surface.

## USER FRIENDLY

Sheets are efficient to use and pick up twice the amount of dirt as the leading national sweeper. Its lightweight design diminishes worker fatigue.

## PERFECT MATCH

AGF has the perfect match for the Biomop™; the Kwik™ system handle with spring-clip frame makes it easy to attach sheets and can be adjusted to suit any height. Biomop™ sheets can also be used with dusting tools or by hand.

### Yarn Technical Data

Fibre	Synthetic biodegradable sheet
Colour	Blue
Ply	Non-woven
Biodegradable	6 weeks: ASTM D6400-99
Application	Use dry only

*This product is certified as biodegradable by an independent third party laboratory under ASTM and DIN standards.*

Product	Size [in]	Material	Description	Pack
70143	24	synthetic	200 Biomop™ hygienic biodegradable sheets	1
21924	24	aluminum	Kwik clip frame and adjustable handle	1
146	24	aluminum	Kwik clip frame only	5
36781	39-67	aluminum	Kwik adjustable handle only	5
21948	47	aluminum	Extra wide Kwik clip frame	1

This product is certified as biodegradable by an independent third party laboratory under ASTM and DIN standards.
