★★★★★ 5-Star Rating: Value for Money

Cuts Down Stripping
Time by Up to **50%**

Prevents Messy Spraying
on Walls, Baseboards Etc.

Cleans Baseboards
in 90% LESS TIME

Converts From **18" to 13"**
Machine (perfect for washrooms)

Transports Easily in
ANY Car

**THREE
IN
ONE**

Replaces 3 separate
machines & SAVES
you money

MADE IN

CANADA

"highly effective, extremely durable and cost effective"

—Brian Gingras, CBSE President Bee-Clean Building Maintenance

5 Ways The Rabbit-1 Stands Head & Shoulders Above Other Floor Machines

1

Cuts Down Stripping Time by Up to 50%

Add one 40lb weight to the Rabbit-1 and cut down your stripping time by 25%. Add a second 40lb weight and you are now able to strip floors 50% FASTER than it would otherwise take you.

2

Prevents Messy Spraying on Walls, Baseboards, Etc.

The integrated SplashGuard on the Rabbit-1 “contains the mess” as you’re stripping floors, preventing nearby walls, baseboards, etc. from getting dirty from the stripping process.

3

Cleans Baseboards in 90% LESS TIME

Easily convert the Rabbit-1 into a Baseboard Cleaning machine by adding the Scrub Jay attachment and the deluxe water tank. Need to clean taller baseboards, no problem. Stack two Scrub Jays and you can now clean-up to 8” high baseboards with total ease.

4

Converts From 18” to 13” Machine (perfect for washrooms)

It takes seconds to detach the Integrated Splashguard on the Rabbit-1 and you now have a 13” downsized machine ready to get the job done in tighter spaces.

5

Transports Easily in ANY Car

Simply detach the handle from the Rabbit-1 machine base (which can be easily done in a matter of seconds) and you can now fit the Rabbit-1 in any car and get to your next job.

9 Engineered Features That Make The Rabbit-1 Easier & Faster To Operate

1) Safety Button / Twist Grip

The twist grip rotates forward to activate the machine, with a slight adjustment to the wrist, it allows for ease of use over many hours of operation. For safety, a simple release of the handle will stop the machine.

2) Handle Height Adjustment

Easily adjust the handle height by turning the tri-nut (without you having to bend down). Allows you to comfortably operate the machine at your hip height.

3) Deluxe Water Tank

This tank holds a generous 4 gallons of water so you don't have to stop and refill it in the middle of your cleaning. The tank is fitted with a durable neoprene lid to prevent spillage when bumping the machine against the baseboards.

4) Flex Hose

The flex hose allows you to easily position the nozzle tip where you want the water to flow on to the Scrub Jay.

5) Scrub Jay #3

The Scrub Jay #3 baseboard cleaning attachment is designed to fit on to any Rabbit-1 or Rabbit-3 machine and takes less than 10 seconds to attach.

6) Drain Plug

When you're done, you can easily drain the water from the tank by opening the drain plug. No need to remove the tank to drain it.

7) Convenient Cord Hook

Allows you to keep the electrical cord neat and properly wound to last longer.

8) Remove Pull Pins & Detach Power Cord

Allows you to detach the handle from the base for easy transportation in any car. Detaching the handle also reduces the weight of the machine if you need to carry it up the stairs.

9) Premium Non-Marking Wheels

The wheels on the Rabbit-3 are rugged, chemical resistant and designed not to leave a mark when transporting the machine.

“the water tank and 40 lbs weight makes the machine’s versatility impressive”

—Dustin Chang, FCH Maintenance
