

The Falcon-1/3/5

Powerful Wet/Dry Industrial Vacuum Cleaner

The Centaur Falcon: Purposefully Designed for Debris & Slush That Would “Choke” Any Other Vacuum Cleaner

★★★★★ 5-Star Rating: Value for Money

A favorite vacuum for the construction/rental industry for its **robust and tough construction**

The large 45-50L (12-13 gal) tank capacity with steel frame is perfect for **demanding and larger jobs**.

The thick polyurethane tank is corrosion resistant and designed for **maximum longevity**.

The larger Falcon-5 HEPA (50L) allows for **direct-to-garbage bag collection**.

Deluxe models come with a **tool caddy & drain hose** for efficiency.

"highly effective, extremely durable and cost effective"

—Brian Gingras, CBSE President Bee-Clean Building Maintenance

The “Building Site Vacuum”

Why Professionals Choose The Falcon-1/3/5

The Falcon is the favourite wet and dry vacuum for the construction and rental industry. If you have a serious vacuum cleaning job on your hands where you need to suck up wet and dry debris... the Falcon is going to do the job better and quicker than most other machines in its class. Let's just say, the Falcon packs the power you need for cleaning up and vacuuming in the toughest of situations!

The Falcon-1 & Falcon-3

45L Wet/Dry Vacuum Cleaner

- ✓ Centaur's Falcon Vacuums are the most robust. They are made with steel components – everything from the frame, motor enclosure, latches and intake.
- ✓ Built for very demanding wet/dry cleaning jobs.
- ✓ Cyclone action separates dirt, while wet/dry (washable) filters provide additional necessary filtration.
- ✓ Deep clean carpets by plugging in a power brush to the onboard auxilliary power outlet.
- ✓ The extra tough 5/16" thick corrosion resistant polyurethane tank provides the durability you need for long life.

The Falcon-5

50L Wet/Dry HEPA Vacuum Cleaner

- ✓ Unique direct-to-garbage bag collection makes cleaning the vacuum as simple as throwing out the trash.
- ✓ The HEPA filtration lets no dust escape. This vacuum will trap 99.97% of dust & dirt, down to 0.3 microns in size.
- ✓ True wet filtration and the powerful, heavy-duty 1100W motor will suck up anything and everything that fits through the 1.5" hose.
- ✓ The Falcon-5 comes standard with drain hose and tool caddy for convenience.
- ✓ Combines all the best features and performance of Centaur's Falcon series vacuum cleaners.

“demonstrable superiority”

—Mike Yabrove, General Manager Janitor's Market Inc.

6 Design Features That Make The Falcon Series Vacuums Easier & Faster to Operate

1) Auxiliary Power Brush Receptacle

Connect a SEBO or Wessel-Werk power brush (sold separately) to the auxiliary power plug provided on the Falcon and you can now use a power brush to deep clean carpets.

2) Steel Intake System

Most other vacs use plastic for connecting the hose into the vacuum which often fails and breaks with time as you drag your vacuum by pulling on the hose. Centaur on the other hand uses a steel intake system for maximum strength and durability so you won't have to worry about the hose/vacuum connection breaking or failing.

3) 1.5 inch Intake

Ideal for picking up larger debris and objects during vacuuming.

4) Double Action Metal Latches

Latches are needed to open and close the vacuum when accessing the filters or emptying the contents. The metal latches Centaur uses provide additional strength and durability, so the latches last a lifetime and don't fail on you.

5) Tool Caddy & Drain Hose

(optional on Falcon-1/3 Deluxe, included w/ Falcon-5)

Allows for fast and easy disposal of liquids after vacuuming and convenient tool storage.

6) Direct-to-Garbage Bag Collection

(Falcon-5 only)

Unique direct-to-garbage bag collection makes cleaning the vacuum as simple as throwing out the trash.

"The suction is nothing short of incredible."

—Blain Konkle - Peterborough, ON (Happy Customer for 20+ Years)
