As the economy begins to grow, there's no better time to identify what emerging trends

can be integrated into your facility.

In this section,

Rubbermaid Commercial Products has compiled important drivers and trends aimed at transforming your property into a world-class location.

### INCREASE PRODUCTIVITY

In March of 2012, IBISWorld reported that access to multiskilled and well-trained staff is vital to ensure high levels of guest service satisfaction. In addition, they reported that the ability to adapt new technology is a key success factor. The primary motive for creating Executive Series was to empower support staff to work smarter by completing tasks more efficiently.

With thousands of innovative cleaning solutions, including customizable carts in a variety of sizes, and a hard floor care system requiring no mop bucket, this is the new technology your facility needs. Rubbermaid PULSE™ Microfiber Hard Floor Cleaning System (1863884) cleans more square feet in less time. Industry-best microfiber, on-board reservoir, and user-controlled release of solution means cleaner floors faster, easier, and more effectively.

### SUSTAINABLE PRODUCTS

In the world of property management, a growing number of building service contractors (BSC) are embracing sustainable initiatives. In fact, a recent study showed 64% of BSCs felt that it is important to buy from manufacturers and distributors who support sustainable improvements. Further, 77% of BSCs are buying and/or using sustainable cleaning products (those products which are green in their manufacturing, use, and disposal).

Rubbermaid Commercial Products has launched the Executive Series line with the same green-minded philosophy as previous product lines. Our Waste and Recycling High-Capacity Cart (1861441) is a smart example for how our solutions can help properties achieve more sustainable methods.

### COMPACT EQUIPMENT

At the 2012 BOMA conference, the trend toward smaller work areas and industrial space was a hot topic. The trend in corporate America today is to have fewer and smaller individual workspaces and a greater portion of the space dedicated to interactive uses in an array of functions and sizes. This shift can be attributed to teams needing intense interaction, with space needed to optimize collaboration ranging from large formal meetings to chance interactions.

With this movement in place, the compact and customizable cleaning solutions of Executive Series will allow cleaning crews to achieve the same efficient results in less time and with less equipment. Our Ultra-Compact High-Capacity Cart (FG919400BLA) provides the ultimate compact cleaning solution. Engineered to hold 40% more supplies, this lightweight cart occupies a smaller footprint than traditional carts and folds easily for quick storage.

For today's professionals, one of the top influencers for work performance is the state of their office. A clean and healthy work environment will help employees to be more productive and improve overall job satisfaction. Rubbermaid Commercial Products is here to help make that happen. As a global market leader, our products touch millions of people in the workplace every day.

We're proud to provide you with the most innovative solutions designed to meet three fundamental principles:

- ENHANCE IMAGE
- IMPROVE PRODUCTIVITY
- PROMOTE SUSTAINABILITY

Since 1968 Rubbermaid Commercial Products has worked to become your partner for the smartest solutions. Like you, we will continue to proudly serve our customers, deliver solutions that matter, and stand behind the proven legacy of our brand.
