Genus® | FUTURA COMPACT

Genus® Futura Compact combines exceptional fly catch with discreet design to offer the first of the next generation of front of house flying insect control units. Its 2 x 15 W lamps offer reduced energy consumption and increased attraction levels to remove flying insects quickly from customer facing areas.

Genus® Futura Compact has been designed specifically to provide the fastest* flying insect catch in front of house areas. Flying insects are a major nuisance for your customers and they give a bad reputation to any establishment. Genus® Futura Compact quickly removes flying insects from the customer environment whilst offering complete discretion.

Genus® Futura Compact is a discreet and silent unit that uses 2 x 15 W lamps and blends seamlessly into your interior decor. Its large fully grid marked glue board provides maximum catch area whilst complying with HACCP guidelines and its electronic ballast engineering means reduced running costs and fewer replacement parts.

The Genus® Futura Compact can be mounted either vertically, horizontally or corner mounted, allowing the flexibility of placement in a premises of any size and style. Designed and engineered with ease of service in mind, the replacement of the glue board and lamps in the Genus® Futura Compact is quick and easy to do. The unit's hinged magnetic catch door gives access to the glue board and the lamps, allowing quick and easy servicing of the unit with both hands free and without the use of any tools.
