

KP1H *Portable*

Cleaning and sanitation takes place throughout your customer's facility. In most cases, access to your cleaning products requires several trips back and forth to the janitor's closet. Clearly, point-of-use delivery of your cleaning solutions is a key factor that can reduce the cost of cleaning and provide a new level of convenience for cleaning personnel.

Today's institutional chemical consumers are looking for "Systems Solutions" to reduce labor and control chemical consumption. The systems you combine with your cleaning products can determine whether or not you make the sale. The KP1H Portable System combines the industry's most popular proportioner ... **The KP1H** with a lightweight, compact rack. The KP1H Portable can be easily taken from one point to another, mounted on a wall, or attached to a maids cart for easy access.

Key Features:

- Portable or Stationary
- 1 Gallon or 4 Quart
- Versatile, Intuitive Design
- Convenient Carrying Handle
- Compact, Lightweight
- Anyone Can Install, Professional
- Bottle Plugs Available from Leading Manufacturers
- No Investment in Proprietary Bottles

Compact and easy to carry.

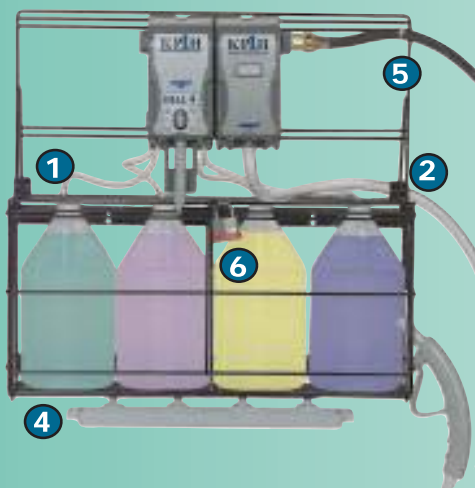

Dial 4 One Handed Bottle Actuated Proportioner - Dispense up to four different cleaning products at individually controlled ratios.

KP1H Bucket Fill Proportioner with "Easy-Lock" Button - Dispense one cleaning product to a mop bucket, Buddy jug, floor machine or auto scrubber at the touch of a button.

KP1H Wire Rack System

The KP1H Wire Rack System provides many useful features for a clean, safe, secure, and professional installation. This economical system features an optional Dispenser Top that snaps into place and accepts any combination of KP1H Proportioners to service any chemical proportioning application.

Top View: Wire Rack Without Dispenser Top

1. Vertical bar provides an effective tube guide for chemical lines centered over bottle openings. Tube Guides provide a neat and clean installation.
2. Tube Ring holds bucket fill hose or neatly bundles chemical lines.

3. 4 Vertical connectors provide mounting for dispenser top.
4. Bottom steel bar provides mounting holes for optional Drip Tray.
5. Optional Dispenser Top easily snaps on to Wire Rack.
6. Locking clasp provides strength and security.
