

 **LINDHAUS**

# RX

*Hepa*

The Lindhaus RX has become renowned worldwide thanks to its superb filtration system and the advanced technology used in its construction.

**APPROVED BY HOSPITALS**

The five-stage filtration system includes, at the final stage, an electrostatic microfilter "3M Filtrete" commonly used in hospitals for biological check. You are guaranteed that all the exhaust air (carbon dust) coming out from the motor brushes is purified, obtaining a superior exhaust air quality.

**HARD FLOOR TOOLS**

The efficient hard floor tools, (LINDHAUS patented), for surfaces like ceramic, marble, wood, will allow you to transform the carpet cleaner into an electric sweeper. Its rubber wheels glide silently over every surface.

With the RX Hepa, the noise level has been reduced and the ease of handling and the operators comfort has been improved.

Both motors are assembled on swinging supports, allowing a further reduction of noise and vibrations.

The replacement of the roller from the side does not need any tools.

The on-board accessories have been improved thanks to the rotating round dusting brush and the telescopic extension wand.

Our success is the customer's satisfaction.

**ELECTRONIC PROTECTION**

The electronic circuit allows you to regulate correctly the height of the roller; it makes the motor start slowly keeping the speed steady; it switches off the motor instantly in case of the roller blocking to avoid damaging the timing belt and all moving parts.

**CHANGING THE BRUSH**

The brush roller is balanced to eliminate vibration at high speed. The brush roller has convergent bristles and is assembled on metal supports with 3 ball bearings. It can easily be replaced without tools. Two rotating cylinders allow the machine to slide along flush with the wall.

**BLOWING**

By using the optional blowing kit you can take advantage of the hermetically sealed components to clear a sink clog, or remove dust from radiators etc. You may also use the suction and blowing action at the same time with an optional hose.

**ON-BOARD TOOLS**

For above the floor cleaning, the RX Hepa is equipped with the Lindhaus patented telescopic wand, rotating round dusting brush, crevice tool and stretch hose. This makes the RX Hepa the most effortless vacuum to use for both carpets and above floor cleaning.

**WORLD CLASS CARPET CLEANER**

The remarkably engineered RX Hepa Carpet Cleaner is equipped with non marking rubber wheels that are uniquely designed to allow the user to easily maneuver the machine in any direction. Two position operation allows the user to lift the base for threshold or use the machine in a horizontal position for the lowest possible clearance

**SPECIAL FILTERS**

**Carbon Active Filter/Microfilters S-Class Hepa Filter**  
 The RX Hepa can be equipped with an optional special S-Class Hepa Filter for healthcare environments, which assures 99.97% filtration efficiency at 0.3 micron for extreme allergy concerns.  
 To trap offensive odors, Lindhaus has developed a special carbon active/microfilter cartridge.

**NET FILTRATION EFFICIENCY**

■ Tests with Microfilter and Carbon F.  
 ■ Test with Hepa Filter

The filtration efficiency tests done on the RX Hepa by the independent laboratory IBR (U.S.A.), show the result of its advanced technology.

**EXTREMELY LOW SOUND LEVEL**

Certainly the quietest machine in its class.  
 The 380 version can be provide , on request, with an advanced electronic control which gives you the possibility to adjust the vacuum motor speed to suit the required noise level.

**DRY CLEANING SYSTEM**

The Dry Cleaning System is the perfect solution for cleaning carpets and rugs with minimal effort.  
 No need to purchase or rent a separate carpet cleaning machine. The patented Dry Cleaning System is an excellent optional accessory that is attached to the base of the Lindhaus upright vacuum cleaner and is used to brush in the ECO DRY Carpet compound.

**ENGINEERED TO LAST**

Precision engineered and computer balanced motors assure low sound levels and long life service. Proven integrated circuits protect motors from overload and assist operator in making the most efficient brush height setting.

**STATE OF ART ACCESSORIES**

RX Hepa has all the optional tools required to make it the most advance cleaning machine on the market today:

- Exclusive tools
- Felt or Wheeled Hard Floor Tool
- Telescopic Wand
- Dry Cleaning System
- Eco Dry Carpet Cleaning Compound
