

# MMT1616

MidMop - A Class All its Own  
The System Supports Both String Mops and Flat Mops

Its compact design allows for easy storage while providing a go anywhere dual bucket mopping system  
The patented wringer is positioned high on the trolley providing better ergonomics and full access to both buckets at all times  
The MidMop permits a true twin bucket system to be followed or the wringer can be easily moved from one side to the other should both buckets be needed  
Total flexibility - it can be used in place on the NPT 1606 or attached to the NC 3000 and 4000 using an optional bracket  
Structural foam construction ensures maximum durability  
Easily removed 4 gallon buckets allow for simple filling and emptying  
Options include a flat mop stand and a versatile 5 quart swing bucket!

Weight	24 LBS
Length	24"
Width	15"
Height	28"
