DRY UP THE RISK OF
CONTAMINATION

Antibacterial Hand Towel

Ideal for use in

- Industrial market
- Institutional market
- Foodservice market
- Food processing industry
- Daycare centers
- Intermediate healthcare institutions
- Education

Cascades® green Antibacterial hand towel is used like a regular paper hand towel. It is meant to complete regular hand washing procedures and to provide a **persistent antibacterial defense**. It **minimizes the risk of contamination** from hand transmitted bacteria by significantly **reducing the residual bacteria left on your hands**. This innovative product distinguishes itself by its unique ability to provide **lasting antibacterial effectiveness for 30 minutes**. Hands are therefore protected of future contamination, an important benefit not offered by most hand hygiene products on the market. Unlike other antibacterial products, Cascades® Antibacterial hand towel has **no expiration date**, facilitating inventory management. It is an essential addition wherever hand hygiene and protection from bacteria are concerns.

GREEN BY NATURE™

cascades® Antibacterial Hand Towel

USE

- Wash hands with water and soap during 20 to 30 seconds as recommended by the Public Health Agency of Canada.
- Thoroughly rinse hands under water in order to eliminate residual soap and maximize the antibacterial action.
- Dry hands with Cascades® green Antibacterial paper towel. When in contact with water, the active ingredient is released and transferred onto your hands. Almost instantly, it will significantly reduce the bacteria left on your hands and offer an antibacterial persistent effect for 30 minutes.

SAFETY INSTRUCTIONS

- For external use only. Do not swallow.
- Avoid contact with eyes. In case of contact, rinse eyes thoroughly with water.
- In case of abnormal skin reaction, stop using this hand towel and consult a doctor.
- Small children must be supervised when using this product. If swallowed, promptly contact a poison control center or a doctor.

Available in 4 sizes:
