

# INDUSTRIAL DEODORANT

## BIG D® INDUSTRIAL DEODORANT

is the classic little wick-equipped bottle that has been keeping rooms odor-free for over 40 years. This oxidizing deodorant works wonders in public restrooms, sick rooms, smoking areas, and little-used or musty rooms. BIG D® **INDUSTRIAL DEODORANT** eliminates any odor from the source through a catalytic reaction which oxidizes odors whenever they meet.

A 1.5 oz. bottle of **INDUSTRIAL DEODORANT** will last up to 45 days, depending on the ventilation conditions of the room. The wick will remain wet as long as there is liquid in the bottle (and wick is not extended beyond the recommended height). The special plastic cap provided with each dozen ordered makes it possible to use the product as drops, directly on a source of odor, without spillage.

4 oz. wick bottles are made for use in large rooms and in big capacity heating/cooling systems. This size will last up to 90 days.

### 1.5 OZ. BOTTLE

PRODUCT NO.	FRAGRANCE
307	Natural
331	Lemon

Packed 12 per carton - Weight 3.3 lbs.  
Packed 6 cartons per shipping case - Weight 21 lbs.

PRODUCT NO.	FRAGRANCE
310	Natural
320	Lemon

Packed 12 per carton - Weight 7 lbs.  
Packed 3 cartons per shipping case - Weight 21 lbs.

## DIRECTIONS FOR USE

Use 1.5 oz. **INDUSTRIAL DEODORANT** in rooms of 1500 to 4500 cu. ft. (a 15 ft. x 20 ft. x 10 ft. room equals 3000 cu. ft.)

The BIG D® **LIGHT-ACTIVATED FAN DISPENSER** is designed to hold wick bottle deodorants. The dispenser has a micro processor switch that can be set to OFF, ON or AUTO, and it is light-activated, so it turns itself off when there is no light in the room, allowing more efficient use of batteries and odor control products. The LED indicator informs you the unit is operating. Constructed of sturdy ABS plastic, it has a sealed motor for long life. The **LIGHT-ACTIVATED FAN DISPENSER** operates on one or two D batteries. One carbon battery will last 30 days, two carbon batteries will last 120 days, and two alkaline batteries will last up to 180 days. The dispenser covers 4,000 cu. ft. of space.

Use 4 oz. **INDUSTRIAL DEODORANT** in larger rooms and/or in big capacity heating and cooling systems. One 4 oz. bottle is recommended for every 10 tons or 4000 CFM. Depending on the design of the unit, the bottle may be placed inside or used close by an air intake point.

## TRY THE DROP TEST DEMONSTRATION

Selling BIG D® **INDUSTRIAL DEODORANT** is easy. Even the most skeptical prospective customer is convinced when you demonstrate on their own home ground. First you ask the engineer, custodian, housekeeper or purchasing agent to take you to the worst smelling restroom on the premises. Next, you sprinkle just a drop or two of **INDUSTRIAL DEODORANT** on the floor if it is ceramic tile, marble or on an ash tray or saucer if it is vinyl or rubber tile, and wait outside for a few minutes to give the oxidation process time to take place. Then ask the person with you to step back inside and smell for themselves the deodorizing job the **INDUSTRIAL DEODORANT** has done. It will never let you down.

## LIGHT-ACTIVATED FAN DISPENSER
